Education

Australian National University – Canberra, ACT
Bachelor of Advanced Computing
Specialisation in Human-Centered & Creative Computing

Expected Dec 2026

Technical Skills

- **Programming Languages:** JavaScript, TypeScript, C#, Java, SQL
- **Frontend:** React, React Native, Astro, React Router, HTML, CSS, Tailwind CSS
- **Backend & Databases:** Node.js, Express.js, PostgreSQL, Prisma
- **Development Tools & Practices:** Git, GitHub, Docker, VS Code, Vercel, Unity, Agile Development
- **AI Development Tools:** Claude, Codex

Projects

J FORCE Video Game | *Unity, C#* | GitHub

Feb 2025 – Nov 2025

- Collaborated with a six-person multidisciplinary team comprising three developers and three artists to develop a dystopian role-playing game in Unity.
- Owned the design and implementation of the enemy AI and pathfinding systems, using a finite-state machine and Unity NavMesh to support patrol, pursuit and combat behaviours.
- Coordinated technical requirements with developers and artists to ensure gameplay systems worked with level designs, animations and visual assets.

Agentic Coding Studio Showcase | AI Development, Claude | Live Site | GitHub

Aug 2026 – Present

- Applying AI coding agents throughout planning, implementation, debugging and review in ongoing ANU coursework, with new projects added to a growing public showcase.
- Developing structured workflows for defining requirements, breaking down tasks and providing project context to guide agents through iterative development.
- Strengthening code-review and debugging skills by evaluating AI-generated changes, checking behaviour through tests and hands-on review, and documenting lessons to improve subsequent work.

Weather Dashboard | *React, TypeScript, Tailwind CSS* | Live Site | GitHub

Jun 2026

- Developed a responsive React and TypeScript weather dashboard with debounced city search, device geolocation, current conditions, selectable seven-day forecasts and detailed hourly information.
- Integrated Open-Meteo and OpenStreetMap APIs to retrieve weather data, search locations and convert device coordinates into readable location names.
- Built a synchronised temperature and precipitation visualisation using Recharts and implemented persistent unit preferences, light and dark themes, loading states and error recovery.

Experience

Coles Belconnen

Mar 2019 – Aug 2024

Team Member

- Entrusted with store-closing procedures, resolving customer concerns and responding to operational issues.
- Held primary responsibility for daily meat-department operations for approximately two years, managing stock availability, product rotation and presentation while supporting other departments when required.

Mount Majura Wines

Jan 2020 – Mar 2020

Vineyard Assistant

- Worked as part of a team to support vineyard and production operations, following safety procedures and adapting to changing priorities to complete physically demanding tasks within daily deadlines.
